Skill Card Reference

How to read each card

Card colors mark the skill category

-  **Strike** — damages enemy pieces.
-  **Shield** — protects or heals allies.
-  **Move** — repositions pieces. Movement-via-skill deals no damage.
-  **Mystic** — buffs one of your other skills this turn.

The 2×2 range matrix

The four mini-grids on each card show the skill's reach in four states. Each grid is centered on the **caster** and shows every tile the skill could target along a queen-line (horizontal, vertical, or diagonal). Skill paths are blocked by any piece in the way.

- Default** Full health, no buffs active.
- + Focus** Caster's side has activated Focus Strike (+1 Range to next skill).
- Injured** Caster is Injured (Skill Range –1). Self and Adjacent skills are unaffected.
- Inj. +Focus** Both effects combined.

Move skills + Focus Strike: On Move skills, the caster chooses, when activating the skill, whether the +1 applies to the **activation range** (how far the skill can target) or the **effect range** (how far it moves/pushes). Not both. The matrix on each Move card shows the activation-range outcome; the italic note under the effect text spells out both options for that specific skill.

Tile colors

-  **Caster.** The piece using the skill.
-  **Reachable tile** (color matches the card category).
-  **Not reachable** — off the queen-line or out of range.
-  **Cannot fire.** The whole grid is greyed out — the skill cannot be cast in that state. (Lance Thrust while Injured.)
